» HIGH-GENERATION

High furniture, the new generation in school furniture

Furniture that exudes innovation. But above all it offers many advantages when compared to traditional school furniture. High Generation is the new generation of school furniture. Chairs and tables with a worktop height of 90 centimetres are suitable for the standing height of the teacher.

High Generation is the new product line of Presikhaaf Schoolmeubelen that focuses on students from the age of 6 until they are young adults. We have been developing school furniture for more than thirty years. Our mission is to ensure that children can learn more easily and with more enjoyment. Our school furniture is professionally manufactured in our own factory. At Presikhaaf Schoolmeubelen, continuous research, our own design and the use of the best materials go hand-in-hand with craftsmanship, durability and environmental awareness. The idea of developing a high student set comes from Scandinavia. Students and teachers are very enthusiastic about this innovative concept. The innovative furniture is a perfect fit for modern education where team learning is given priority and where the teacher has a supervisory role.

Craftsmanship and modern production facilities come together in our well-equipped factory. The result is a modern design and the best possible quality. Presikhaaf Schoolmeubelen furniture is reliable and has a perfect finish.

A better sitting posture improves learning performance

At the same height with the student

High Generation school furniture has been designed to the standing height of the teacher. Having to bend over excessively to be able to address students at eye height is a thing of the past. There is direct contact because the teacher stands at the same height as the seated student. This boosts student concentration. The teacher benefits too. Teaching will be easier and working will be more pleasant. Back problems will be avoided due to the ergonomically positioned height of the furniture.

'I think it is great that I can now concentrate better'

Flexible workplace

All tables at the same height; this will benefit teamwork. The difference in height of students is no longer an issue. Uniformity ensures that the feel of the classroom is more peaceful. It will also be more peaceful because, when seated, chairs and tables can no longer be moved and tilted. Instead of a drawer, students will have a bag that hangs on the side of their chair. They can easily access their things without having to vacate their chair. They can also sit somewhere else with their bag; for example, at the teacher's instruction table or at the computer workplace.

Chairs

A better sitting posture means better concentration
Tilting your chair and rocking backwards and forwards are things of the past now that students sit at a higher level. Children can better concentrate and this will increase their learning performance. The High Generation chairs cater for the different heights of students and can be supplied in five sizes. The distance between the foot rest and the top of the seat determines the standard height. Everything is thought of. There is a bracket to the left and right of the chair on which the special bag can be hung. It is easy to slide the chairs under the tabletop because of the bracket on the table frame and, therefore, cleaners can go about their business as normal.

All High Generation chairs are equipped with a scratch-proof Plydec seat and back. The furniture design is in beech or birch. The size of the chairs is indicated by a coloured cap at the top of the frame. Every size has its own colour. The teacher's chair has an adjustable foot ring and many additional options and is equipped with castors. The seat is made of Dralon and can be supplied in different colours.

Bags

Practical and in cheerful colours
Students no longer have to leave their seats to get their things. Books and notebooks are in solid and cheerfully-coloured bags that hang from a special bracket to the left or right of the chair. Changing seats or classrooms is simple. You do not have to move furniture around but you just need to take your bag. The bag has a removable pen case and an exchangeable name label holder. Schools can put additional emphasis on their own identity by having each bag made in the colours of the school and with the school logo.

The bags are made of foil reinforced with fibre. They measure 400 mm x 90 mm x 280 mm (w x d x h) and can be supplied in a range of colours. No more than three colours per bag and, if required, with the school logo on the front.

Working together is a lot more pleasant'

Tables

Everything at the same height

All tables are 90 centimetres high. This will give a tidy and peaceful feel to the classroom and will boost teamwork. The height fits the standing height of the teacher who will no longer have to bend over. The student will have more eye contact during lessons so that the teaching material will be better absorbed. Children will have a better posture when sitting at these tables. A half-standing working posture is, however, also possible. This is beneficial to your back and you can keep this up for longer periods of time. The tables can be supplied in different models: student tables, group tables, instruction tables, computer tables and teacher desks.

PL-20-H
with a five-corner top with a chair holder

Can also be supplied as a semicircular table.

PL-20-H
with a 70 x 50 cm top and a chair holder

T-53-H
top dimensions 160 x 80 x 80 x 80 cm

T-52-H
top dimensions 160 x 80 cm

B-52-H
top dimensions 160 x 80 cm with a drawer unit (2 drawers)

Computerwork places

Custom made at a uniform height

The computer workplaces in schools are different with regard to set-up and design. One school will decide to have a separate room or corner while another school will decide to have a dedicated corner in the classroom as their computer workplace. Simple set-ups or luxurious variants. The design and models of the computer tables are, therefore, determined in consultation with you. Many variants are possible. The tabletop height, however, is uniform. A student can then take his or her High Generation chair and sit in front of the computer.

MKGR-F modular cupboard

This modular cupboard can be supplied with plastic drawers in 3 sizes: 7 cm, 15 cm and 30 cm.

The 7 cm and 15 cm drawers can be supplied in the following colours: Red, Yellow, Blue, Green, Dark green, Transparent, Dark blue, Pink and Purple.
